

Using these event templates

Hello, and thank you for helping spread the word about Pro Bono Week!

We've made templates so you can create eye-catching social media graphics quickly and easily. You'll find them in two formats:

Photoshop files

These are the Photoshop files in this folder. They're a great choice if you or your design team already use Photoshop and want full control over the finished look.

Canva templates

No design software? No problem! Canva is free to use and works in your browser. Click a link below, then choose "Use template" to start customising.

SQUARE VERSION (1500 x 1500 px)

TALL VERSION (1600 x 2000 px)

<https://canva.link/tvm713ps4cjc2z1>

Which size should I use?

It's entirely up to you and ultimately a question of personal preference.

Both the square and tall versions have been designed with LinkedIn, Instagram, Facebook, Bluesky and X (Twitter) in mind.

Tall graphics are particularly well suited to mobile devices, as they take up more space on a vertical screen. You might find that the square versions make more sense on your website or a page usually viewed on a PC.
